The OIG (Office of the Inspector General) recommends that an in-depth Compliance Audit be performed annually as part of an effective Corporate Compliance plan. External auditing can be an effective tool not only to correct areas of non-compliance, but to reduce fines and civil monetary penalties imposed by the OIG.

Areas of non-compliance put a facility at risk of losing revenue due to inefficient functions within the facility, inaccurate coding of MDS or claims, and lack of supportive documentation.

Celtic Consulting frequently provides oversight and regular assessments of a facility's compliance including:

- Compliance Oversight
- Independent (External) Compliance Auditing
- OBRA Survey and Certification
- Corrective Action Plan Development
- Identification of Organizational Financial Risk Indicators
- Rehab Documentation Compliance
- Corporate Integrity Agreement Auditing & Reporting
